REEF HQ

BELGIAN GARDENS STATE SCHOOL

Some of the fish tanks at BGSS – The only primary school in the world breeding Clown Fish – Only 2 other high schools in the world, breed the fish.

I bet you've never seen a fish as cute as this!

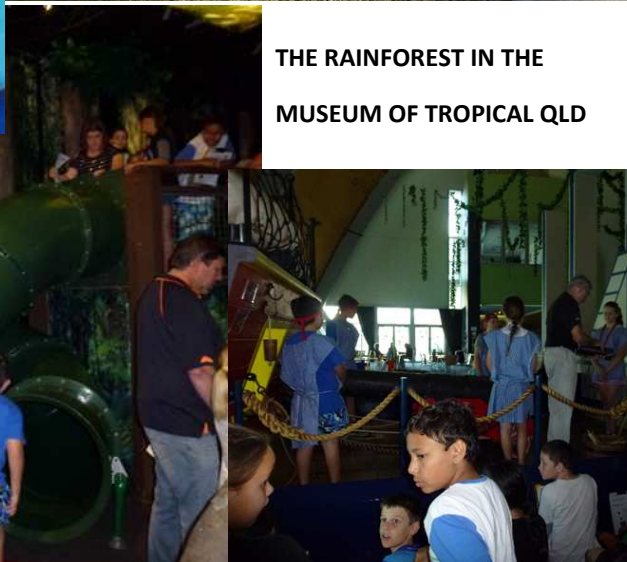

DON'T USE PLASTIC IF POSSIBLE & THROW YOUR RUBBISH IN THE BIN SO WE DON'T GET SICK

THOUSANDS & THOUSANDS OF US DIE

THE RAINFOREST IN THE MUSEUM OF TROPICAL QLD

Gees they're funny looking creatures on the other side of the glass

YEAR 4/5 Reef HQ Camp was FANTASTIC !!!!

Thank you to all the parents/caregivers for letting your children come on camp. Thank you for trusting we would keep them safe. Thank you for giving your children the opportunity to learn in a different way. Lots of children found new friends. Some children showed to others (who didn't know) what great people they are. Lots of children were very helpful in doing various jobs. All in all it was a fantastic learning experience!!

The children were excellently behaved – making camp happy.

We can't thank enough, the parents who gave up work and families to help supervise the children for three days. These dedicated dads reinforced our expectations for behaviour and were excellent role models for the young men in the group. Our young ladies also had the benefit of the support and encouragement of these dads.

Mr Johns (an old hand now) entertained us to set a mellow mood and played games so we all had fun.

Mr Fisher was the best storyteller to make camp exciting. We learned how to tell stories too!

Mr Srsen kept us fed so we had enough energy to do all the fun stuff.

Mr Anvari set exercise activities so we were active to make us healthy.

Mrs Petrass made sure we took our medicine and

Miss Randall rocked the ~~house~~-bus with her energetic and happy vibe.

The feedback we have from the kids is that they really enjoyed everything . . . except getting up at 6am to be ready by 7am, to do exercise.

Zachary Timor stood out for displaying maturity and excellent behaviour. Well done Zac!

A couple of businesses also contributed with making this camping experience such a positive one.

A big thankyou to Woolworths Mount Pleasant for **donating** the excellent quality fruit we took with us.

A special thankyou to the Subway Sandwich store on Flinders Street in Townsville who gave excellent service on short notice, with tasty, full, fresh rolls.

I have already started with initial camping preparations for next year and look forward to offering as part of the school's camping program, another great learning experience for our Beaconsfield students.

Mrs Storey

Toxins are at the highest concentration when man eats seafood and other animals that have ingested plastics or the toxins from them

Toxins multiply in concentration each time one animal is eaten by a bigger predator – some animals die and some survive
